DETAILED ACTION

1. This Office Action is in response to communications filed December 7, 2007 in reference to application 10/720,762. Claims 8-10 are pending in the application and have been examined.

Response to Amendment

2. The amendment filed December 7, 2007 has been accepted and considered in this office action. Claims 1-7 and 11-17 have been cancelled.

Allowable Subject Matter

3. Claims 8-10 allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art of Subramaniam and Kawahara or a combination of the prior art does not teach nor fairly suggest the limitations calculating a number of bits used for the Huffman-coding, and setting the number of bits to use a number of bits smaller than the calculated number of bits in order to control a bit rate; and

determining whether a scale factor band gain has increased in the plurality of frequency bands, and if the scale factor band gain has increased in the plurality of frequency bands, ending the shaping quantization noise energy using the stored scale factor.

The prior art of record does not teach not fairly suggest these limitations, nor does any combination of the prior art.

Claims 9 and 10 are allowed as they are dependent on claim 8 and further limit the claim.
